I have the honour to invite a reference to your office letter No. 3909/214-1929 dated 1-6-1931 conveying the sanction of the Hon'ble the Resident for filling up the post of European Bailiff of this Court and to state that F. R. Brunton was accordingly appointed to act as European Bailiff of this Court by my predecessor with effect from 4-6-1931. F. R. Brunton served in the British Army during the time of the Great War and has a good record of service in the Army with four British War medals to his credit. He has been officiating as European Bailiff of this Court without any break of service from 4-6-1931 and his work during this period has been satisfactory. The Residency Surgeon has certified to the physical fitness of F. R. Brunton for discharging the duties of European Bailiff of this Court. As F.R.Brunton is 41 years old (his date of birth being given as 24-8-1893), I have the honour to request that the Hon'ble the Resident may be pleased to exempt the former from the operation of the age-limit rule to enable me to confirm him in his post.

Hajee Sir Ismail Sait's Gosha Hospital
Bangalore.
5th December 1934.

To

The Residency Surgeon,

Bangalore.

Sir,

With reference to your letter No.1919.dated 1-12-1934 I would ask you to kindly recommend compounder.Guru Bai.Matapathie to be exempted from the age restriction rules and entertained permanently, as besides being a reliable compounder, regular at her work, methodical and neat-she is also quiet and gentle with the patients.

The women we get as patients in this hospital; being Purdah women, are very quickly upset and frightened-and in the interests of the hospital I have found it necessary to have members of the staff who do not get impatient with them.

We have had compounders previously who joined within the age restriction rules, but being young did not appear to be wholly interested in their work, and in a short time resigned because arrangements were made for them to be married, and this meant constant changes in the staff.

Guru Bai Matapathie being a widow, and more steady than the other compounders we have had, and is likely to remain with us permanently.
